DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear how the stuffed toy further limit the claimed method.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Scheib.

Regarding claims 1 and 8, Scheib teaches in the figures a wedge tool comprising a first elongated arm (11), a second elongated arm (10), a handle (13,14) and an elongated wedge tip (12).

Regarding claims 2 and 3, Scheib teaches a wedge point distal (fig.1).

Regarding claims 4-7 and 9-13, Scheib teaches a cavity proximate the second end (fig.1), an elongated wedge tip receiver (fig.1) and an indentation (fig.1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Scheibin view of Swift.

Regarding claim 14, Swift teaches a stuffed toy; however, fails to teach how to close a stuffed toy. Scheib teaches in the figures method of closing stuffed toy comprising inserting the wedge tip (fig.5; col. 3, par.6-8), compressing (fig.5; col.3, par. 6-8), pulling (fig.5; col. 3, par.6-8), halting (fig.5; col. 3, par. 6-8), releasing (fig.5; col. 3, par. 6-8), and removing (fig.5; col. 3, par. 6-8). It should be noted that the tool of Scheib is capable of closing the stuffed toy. It would have been obvious to one having ordinary skill in the art to provided wedge tool as taught by Scheib to close the toy of Swift.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patton teaches a slide fastener repair tool. Shafir teaches a free standing tweezer. Kern teaches tweezers. Miller et al teach a closing device. Henkel teaches tweezers.
